

ENVIRONMENTAL POLICY STATEMENT

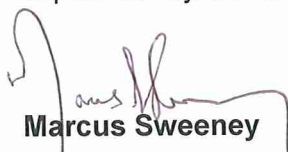

Techrete is a leading company in the design, manufacture and installation of architectural precast cladding. We see our involvement as an opportunity to create and add aesthetically to the built environment, without in any way jeopardising the broader environment.

We promote sustainability both in the design and function of our products and in the processes used in their manufacture. We work so that our choices today will not limit others choices tomorrow. Our environmental management system supports this policy and provides the framework for setting and reviewing objectives and targets. It is also our objective to meet the requirements of ISO 14001 environmental management standard.

Our approach is commitment to:

- Keep fully informed of all relevant legislation, regulations and other requirements within the industry and monitor our operations to ensure compliance.
- Meet all regulatory and consent requirements pertaining to our business.
- Operate a thoughtful buying policy, giving preference to materials from sustainable sources, with minimal packaging and procure products and services which are less damaging to the environment.
- Encourage continuous improvement in all our activities and practices.
- Work with subcontractors, suppliers and clients to encourage environmental awareness and sustainability and to identify and to share best practice and ways of reducing negative environmental impacts.
- Actively prevent pollution to the land, water and the atmosphere.
- Monitor and reduce our consumption of energy, fuel and materials and minimise waste and CO2 emissions.
- Avoid creating waste and encourage re-use, recycling and recovery of resources in all company activities.
- Manage our buildings and construction sites in an environmentally sensitive manner.
- Employ best available techniques to significantly reduce our impacts to the environment.
- Respond positively to environmental initiatives by reviewing such issues with the relevant authorities, local communities and others as appropriate.

Techrete management are responsible for implementing the policy and for providing input to the formulation and subsequent modification of the policy. The co-operation of all of our employees is sought to enable us to achieve this important objective.
